SUMMARY

Computer Science student at BINUS University focused on databases. I design relational schemas, build ETL pipelines and turn raw data into clear answers, and I build full-stack web apps on top of PostgreSQL. Looking for an internship in data analytics or data engineering.

EDUCATION

BINUS University Bachelor's student, Computer Science | Focus: databases — 2024 – Present

- Current GPA: **3.41 / 4.00**

SKILLS

Languages	Python, SQL, JavaScript, Java, C, R, HTML, CSS
Data & Databases	PostgreSQL, star schema / dimensional modelling, 3NF design, Pentaho Data Integration (ETL), data quality checks, query tuning (EXPLAIN ANALYZE), pandas, matplotlib, Jupyter
Web	React, Vite, Tailwind CSS, Node.js, Express, REST APIs, JWT authentication
Tools	Git, GitHub, Vercel, Neon

SOFT SKILLS

- Teamwork & collaboration
- Focus & attention to detail
- Analytical thinking & problem-solving
- Discipline & consistency

PROJECTS

VieMeal, Meal Planner & Nutrition App *React, Node.js, Express, PostgreSQL* — Live demo | GitHub

- Full-stack PWA for calorie and macro targets, food diary, progress charts and meal plans; **19-table PostgreSQL schema in 3NF** with raw parameterized SQL (no ORM).
- Imported **7,793 USDA foods** plus 84 Indonesian dishes; **typo-tolerant pg_trgm search** with a GIN index, filtered by diet and allergies.
- Rule-based planner keeps each day within **±10% of the calorie target**; optional server-side Gemini assistant never invents nutrition numbers. Deployed on Vercel + Neon.

Olist E-commerce Data Warehouse *PostgreSQL, Pentaho, SQL, Python* — GitHub

- Built a **star schema** warehouse (112,650-row fact table, 5 dimensions) from 9 raw CSV files covering about 100K Brazilian e-commerce orders.
- Wrote a **Pentaho ETL** job and equivalent SQL + Python pipeline; both matched on 9 checked metrics. Added quality checks, 12 business queries, RFM analysis and 3 Python dashboards.
- Found late deliveries cut average review from 4.29 to 2.57 stars, while only 3% of customers ordered again.

Tiket-IN, Event Ticketing *React, Node.js, Express, PostgreSQL* Live demo | GitHub

- Full-stack app with accounts, event browsing, seat map and admin sales report; **7-table schema in 3NF** with raw parameterized SQL (no ORM).
- Prevents double booking with a **transaction, row locking (SELECT ... FOR UPDATE)** and UNIQUE constraint; 10 simultaneous bookings: 1 succeeds, 9 are rejected. Deployed on Vercel + Neon.

vmWeather, Weather Dashboard *React, Vite, Tailwind CSS, Leaflet* Live demo | GitHub

- Responsive weather app with debounced city search, current conditions, 24-hour and 7-day forecasts, clickable map, geolocation and saved preferences. Uses free Open-Meteo API; deployed on Vercel.

INTERESTS

Data analytics, data engineering, machine learning. Away from coding: billiards (for focus) and gym.
